The Principal's Report

It is the great pleasure in presenting the Annual Report of N.S.S College, Nilamel established on 1964 documenting its progress and success. The year 2020to2021 was marked with few events through online mode due Covid pandemic. This can achieved by the devotion of faculties throughout the year. The College operates admission to the students by Online a centralized system of admission in the university. In all the courses of both UG and PG the students can get admission through online process. The college offers 11 UG , 02 PG and a PhD Programmers duly affiliated to the University and approved by the Department of Higher Education. The college plans and organized the teaching learning, continues evaluation process, Project Work and examination schedules as per the curriculum issued by the university and approved by Department of Higher Education. College bring to being good results in the university both in UG and PG. The college has well qualified and competent faculties , have attended Faculty development programmes like orientation and refresher program in various universities.

Assistance from University Grants Commission for XIIth plan period.

Details of projects submitted to UGC/other agencies and details of running projects (Assistance from **RUSA**) : Rs 2,00,00,000/to

INTERNATIONAL WEBINAR ON MEMBRANE TECHNOLOGY FOR WATER PURIFICATION (05-08-2020)

Department of chemistry organized an international webinar on membrane technology for water purification (05-08-2020) on google meet plat form.

Webinar
Organized by
Department of Chemistry
NSS College, Nilamel

Topic:
*Membrane Technology
for Water Purification*

Date: 5-8-2020
Time: 10 AM

Speaker:
Dr Akhil Gopalakrishnan
Postdoctoral Researcher
Karlsruhe Institute of Technology
(KIT), Germany

The poster features a green background with white and yellow text. At the bottom, there is a small photograph of Dr. Akhil Gopalakrishnan, a man with a beard wearing a dark jacket, standing in front of a building with flags.

Dr. Sobha V Nair explained that post-translational modifications (PTMs) dramatically enhance the capabilities of proteins. They introduce new functionalities and dynamically control protein activity by modulating intra- and intermolecular interactions. The majority of all proteins undergo posttranslational modifications that significantly alter their physical and chemical properties, including their folding and conformation distribution, their stability, and, consequently, their activity and function. She concluded that posttranslational modification (PTM) is a key mechanism for regulating diverse protein functions, and thus critically affects many essential biological processes. There were **85 precipitants** including students from various departments (biochemistry, mathematics, zoology, chemistry, malayalam, history and commerce) in the webinar. It is followed by an active discussion. Miss Gouri S, (S3 Biochemistry) conveyed votes of Thanks. The meeting came to an end by 12.00 pm.
